

Our Story

Internships is the first foot into the waters of work experience. Yet, almost 90% of students leaving school in Kenya will never get an internship.

About the program.

In Kenya, getting an attachment or internship is almost as hard as getting a job and without connections, students miss this valuable opportunity to get work experience. Companies don't want to spend money training freshers who are likely to leave in future. But it has to be done.

Spaceyatech Internships are solving this.

We opened up our internal engineering team and the Mentorl1st codebase to interns, to [shadow our seniors, coupled with community mentorship](#). In the first cohort, we took in 20 interns across the full stack of technologies, from design, to frontend development, backend and DevOps.

Meet Our Team

Fred Ouko
Internship Coordinator

Hudson Obai
*Supervisor,
Backend and
DevOps*

Rachel Nafula
Supervisor, Android

Emmy Akinyi
Supervisor, Design

Ian Mugenya
*Head of Mentorship and
Supervisor, Frontend
Development*

Program Structure

A brief overview of our program's structure

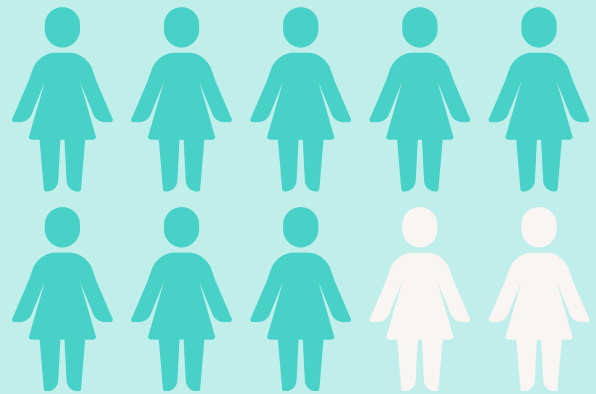

Our program is designed to deliver a comprehensive and structured learning experience. The intern is taken through two phases of the program. First, the intern gets to work on tasks assigned to them by their supervisor from the Mentor1st and SpaceYaTech software products. The interns will get to explain what they did thrice a week in standups. Every Friday, the interns meet with various industry experts in an AMA session.

COHORT 1 IN NUMBERS

We have already taken in cohort 1 in Android, DevOps and Backend with Java Springboot tracks

40%

Of our interns are women

KEY HIGHLIGHTS

- The DevOps and Backend track is supervised by Hudson and has already completed onboarding
- All five android candidates were taken to make the Android team 6 in total
- Design team is carrying on with cohort 1 from 2022
- The mentorship sessions are facilitated by [Mentorslt.com](https://mentorslt.com).
- #SYTTechTalks, the SYT webinar is being revamped to support the internship with mentorship sessions

12-month Plan

Graduation rate

Graduate over 50 interns and help 30% to secure entry level industry roles.

Grow our community

Partner with communities and corporates to develop a network of mentors and coaches.

Attract grant funding for the program

We can not do this alone. We look forward to support from the community and corporates , either monetarily or in terms of services.

Expand out tech stack and projects to include client companies

We look forward to offering training for companies, using their tech stacks or knowledge areas they need. through a demand-driven labor market model
